SCHOOL ACTIVITY AND
RESOURCE GUIDE

The Lost Words Oxfordshire

School Activity and Resource Guide

Since its publication in October 2017, *The Lost Words* by Robert MacFarlane and Jackie Morris has conjured a particular kind of magic in schools.

The unique appeal of this book is that it opens eyes to a truth long suspected in classrooms: that the words of the natural world – Acorn, Bramble, Dandelion, Otter – are fading from children’s minds. The Lost Words stands, with teachers, librarians and educators across the UK, against this disappearance of wild childhood. It is a joyful celebration of language, inspiring children (and adults) to rekindle their relationship with the natural world around them.

It is this vital rekindling of learning about the natural world that inspired the successful Lost Words Oxfordshire campaign, which has raised enough funds to provide a copy of *The Lost Words* and the *Explorers Guide* to every school in Oxfordshire.

This guide has been produced by The Lost Words Oxfordshire campaign to provide schools with information on a range of nature based learning activities and resources available to schools in Oxfordshire. We hope that these will enable schools to add further value to *The Lost Words* book and *Explorer’s Guide*.

This guide showcases a fantastic array of opportunities available to schools.

We would love to hear your feedback and especially if you have found the guide useful.

"Watching The Lost Words take root and flourish in schools around the country over the past year has been amazing. The book has drawn teachers and children outside, exchanging the classroom for trips to woods, learning the names of the everyday creatures and plants with which we share our landscape.

At a time when the arts are under threat in schools, and wildlife is under threat in the landscape, it's hugely inspiring to me and Jackie that a project is underway in Oxfordshire to bring creativity and nature back into children's lives."

Robert Macfarlane

"The placing of books into schools and the generosity of those who work so hard to make this happen is so heart lifting for both myself and Robert. It is so important to democratise the access for children to books, to knowledge.

I found my way into the world through the school libraries when I was a child. I hope children and teachers find the book to be a place they can rest and thrive and grow in these testing times."

Jackie Morris
